

FACULTY OF ELECTRICAL ENGINEERING AND INFORMATION TECHNOLOGIES

BACHELOR'S DEGREE STUDY

UNIVERSITY OF ŽILINA IN ŽILINA

Faculty of Electrical Engineering and Information Technologies

CONTACT

University of Žilina in Žilina
Faculty of Electrical Engineering and Information Technologies

Univerzitná 8215/1, 010 26 Žilina

Tel.: 041/513 20 51

e-mail: studref@fel.uniza.sk

<http://fel.uniza.sk>

All the questions concerning your study you can direct to the Department of Studies:

Tel.: 041/513 20 63, 20 64

Institute of Aurel Stodola in Liptovský Mikuláš

Faculty of Electrical Engineering and Information Technologies, Liptovský
Mikuláš ul. kpt. Jána Nálepku 1390, 031 01 Liptovský Mikuláš

Tel: 041/513 14 83

e-mail: studijne@lm.uniza.sk

Coordinator for work with students with special needs:

doc. Ing. Peter Bracínik, PhD., prodekan FEIT pre vzdelávanie

Tel.: 041/513 20 57

e-mail: peter.bracinik@feit.uniza.sk

ACCREDITED STUDY PROGRAMMES OFFERED FOR THE ACADEMIC YEAR 2020/2021

BACHELOR'S DEGREE STUDY PROGRAMMES	
FULL-TIME STUDY	PART-TIME STUDY *
LENGTH OF STUDY 3 YEARS	LENGTH OF STUDY 4 YEARS
Automation	-
Autotronics	-
Biomedical Engineering	-
Digital Technologies	Digital Technologies
Electrical Engineering	-
Multimedia Technologies	-
Telecommunications	-

** standard tuition fee for part-time study programmes is € 500 for an academic year*

Note:

- Bachelor's degree study programme Digital Technologies is taught only at the Institute of Aurel Stodola in Liptovský Mikuláš.
- In the study programme Electrical Engineering, by the selection of optional courses, the students may specialise in one of the following areas: Car Electrical Engineering, Electric Drives, Electric Power Systems, Power Electronic Systems.

Detailed information about particular study programmes:

- syllabus,
- course information sheets

can be found at <http://vzdelavanie.uniza.sk/vzdelavanie/plany.php>.

EXPECTED NUMBER OF ACCEPTED APPLICANTS TO THE FIRST YEAR

STUDY PROGRAMME / FIELD OF STUDY	PLANNED CAPACITY	
	FULL-TIME	PART-TIME
Automation / Cybernetics	80	-
Autotronics / Electrical and Electronics Engineering	50	-
Biomedical Engineering / Electrical and Electronics Engineering	50	-
Digital Technologies / Computer Science **	80	30
Electrical Engineering / Electrical and Electronics Engineering	160	-
Electro-optics / Electrical and Electronics Engineering ***	30	-
Multimedia Technologies / Computer Science	100	-
Telecommunications / Computer Science **	130	-
Communication and Information Technologies / Computer Science *	210	-
TOTAL	680	30

* after accreditation, the **study programme will be offered** from the academic year 2020/2021 instead of study programmes Telecommunications and Digital Technologies (marked by **)

*** after accreditation, the **study programme will be offered** from the academic year 2020/2021

In case of a small number of applicants, the Faculty retains the right not to open the study programme and to offer candidates another study programme in the same or related field of study.

In case of a small number of applicants for the part-time study, the Faculty retains the right not to open the study programme.

TERMS AND CONDITIONS OF ADMISSION

Basic condition of admission

The basic condition for the admission to the bachelor's degree study programme (first degree) at the Faculty of Electrical Engineering and Information Technologies is the full completion of secondary education or full secondary vocational education (Higher Education Act, n.131/2002 Coll.). In the case of a foreign applicant or a student who has completed a secondary education abroad, the education is comparable with an education completed by a school leaving examination in the Slovak Republic. Applicant who has completed secondary education abroad will submit along with the application form or more precisely no later than the date of enrolment a document on completion of secondary education recognized by a relevant institution in the Slovak Republic.

The Faculty of Electrical Engineering and Information Technologies UNIZA will not accept candidates who have already failed two or more times at the Faculty of Electrical Engineering and Information Technologies UNIZA in any bachelor programme.

Written and oral command of Slovak language or Czech language is required for study at the Faculty. Applicants who have completed secondary education abroad (except the Czech Republic) and apply for study in the Slovak language will submit along with the application form or more precisely no later than the date of enrolment a certificate/document of the level of knowledge of the Slovak language.

Other conditions of admission

1. No entrance exams

Applicants will be admitted to the study without entrance exams (except for applicants for the study programme *Multimedia Technologies*) if they meet the legal conditions for bachelor's study (see Basic condition for admission).

If the applicant has submitted all the required enclosures to the application form, the admission procedure takes place without the personal participation of the applicants.

2. Entrance exam for the **study programme Multimedia Technologies**

Applicants for the study programme Multimedia Technologies will undergo entrance exam consisting of three parts:

- presentation of the applicant's motivation to study the study programme,
 - evaluation of the applicant's learning outcomes and his/her general overview,
 - presentation of multimedia activities and secondary school knowledge of the applicant, including clarification of the procedures and techniques used.
3. Written and oral command of Slovak language or Czech language is required for study at the Faculty. Applicants who have completed secondary education abroad (except the Czech Republic) and apply for study in the Slovak language will submit along with the application form or more precisely no later than the date of enrolment a certificate/document of the level of knowledge of the Slovak language.

ADMISSION OF FOREIGN STUDENTS

The basic and other terms and conditions of admission are applicable as for the applicants from abroad as for the applicants from Slovakia.

Foreign students who study in a foreign language (i.e. not Slovak), pay the tuition fee as stated in § 92 Subsection 8 (Higher Education Act). The tuition fee is specified by the UNIZA directive for the respective academic year, which can be found on the university website. Foreign students who study in the Slovak language do not have to pay the tuition fee. Applicants from the Czech Republic who want to apply and study in Žilina can use the application form valid in the Czech Republic. Applicants who do not actively speak Slovak or Czech are required to attend the language training (it is possible to attend the Slovak language courses at UNIZA). For foreign applicants who were accepted on the basis of intergovernmental agreements, bilateral agreements or Slovak government grants, terms and conditions stated in respective documents are applicable.

APPLICATION FORM

Application forms are to be submitted for individual study programmes.

In case the applicant is interested in more study programmes, it is necessary to apply for each one individually, including payment of the respective admission procedure fees.

Applicants have to fill in an electronic application form that can be found on the website of the Faculty of Electrical Engineering and Information Technologies: (<http://fel.uniza.sk/> in the section Uchádzači o štúdium) or on the university website <https://vzdelavanie.uniza.sk/prijimacky/index.php> or on the education portal: [https:// prihlaskavs.sk/sk/](https://prihlaskavs.sk/sk/).

Concerning application form, it is necessary to enclose all the required documents and send it electronically or by post to the address of the Faculty of Electrical Engineering and Information Technologies UNIZA within the stipulated deadlines.

In case of incomplete application form, applicants will be requested to complete it.

In the absence or a failure of entrance exams, the Faculty does not refund the admission fee.

If the applicant wants to take part in entrance exams at several faculties of UNIZA, the application forms must be submitted separately to each faculty and the respective admission procedure fees paid separately to each faculty.

Enclosures for the bachelor´s degree study programmes (to be sent with application forms):

1. Curriculum Vitae,
2. proof of payment of the admission fee,
3. copies of annual secondary school certificates.

Upon completion of the school-leaving examination, applicants will send or enclose with the application form a copy of the school-leaving examination certificate and the year-end report from the final year of secondary school study to date, which will be announced to each applicant in writing.

Admission fee:Send **20 €** to:

Žilinská univerzita v Žiline, Univerzitná 1, 010 26 Žilina

Bank: Štátna pokladnica

IBAN: SK74 8180 0000 0070 0026 9917

const. symbol: 0308

variable symbol: 10331 - bakalárske štúdium

Payment method:

payment can be paid by bank transfer or postal order to the account above.

Proof of payment:

proof of payment is to be sent to the Faculty with the application form.

With payment of the admission fee from the EU member states, the EES countries, territories that are considered a part of the EU (Treaty of Rome, Section 299) and SEPA countries, it is necessary to use BIC: **SPSRSKBAXXX**, IBAN: **SK74 8180 0000 0070 0026 9917**.

Tuition fees - in accordance with the Higher Education Act, information about the amount of tuition for the respective academic year will be announced on the website of the University of Žilina.

**USEFUL DATES**

Open Day	Deadline for submitting the application form	Entrance exams
February, 4, 2020	until March, 31, 2020	June, 22, 2020

**ACCOMMODATION**

All the students of the first year of the bachelor degree study are entitled to accommodation in accordance with the internal regulations of the university. **Student accommodation facilities cost approx.: € 41 € – € 51 per month.**

**BOARD**

Students can use services of catering facilities of the University of Žilina in Žilina. **Price for food: 1,10 € – 2,40 €.**

**SCHOLARSHIPS**

Students of all study programmes can obtain motivational scholarships (for excellent results or exceptional achievements) in accordance with the stated criteria. **Students of all study programmes can obtain motivational departmental scholarships in accordance with the stated criteria. Students can apply for a social scholarship at any time during the study.**

**FOLLOW-UP STUDY AFTER COMPLETION OF BACHELOR'S DEGREE STUDY**

There is a possibility for continuing bachelor's degree study within follow-up master's (engineer) degree study programmes at the Faculty of Electrical Engineering and Information Technologies UNIZA in the academic year 2020/2021 – Applied Telematics, Biomedical Engineering, Electric Power Systems, Electric Drives, Photonics, Process Control,

Telecommunications and Radio-communications Engineering, Power (and) Electronic Systems (respective information about particular study programmes is available at the university website). After completing the bachelor's degree, it is necessary to verify the current state of the offer of study programmes in a particular academic year.

GRADUATE PROSPECTS

BACHELOR 'S DEGREE STUDY PROGRAMMES

AUTOMATION

(Field of study Cybernetics)

Graduate has acquired education in the field of automation and process control with the support of information and communication technologies. He/she has also practical experience in application of safety critical control and communication systems performed mainly based on PLC and industrial networks. He/she will successfully apply in the operation of control and information systems at the process and operative level. Theoretical knowledge acquired during the bachelor study will create good prerequisites for further education, either within the further forms of university study or within lifelong education.

Software skills: C language, C++, MATLAB, PLC, ATMEL, MS ACCESS, HTML, CSS, Tia Portal.

AUTOTRONICS

(Field of study Electrical and Electronics Engineering)

Graduate has acquired basic and general knowledge required in wide spectrum of electrical proficiency especially in areas of automobile electronics, hybrid vehicles and electric vehicles. Gained knowledge is needed for the second degree study programmes in this study programme or affinitive ones. Even if the graduate does not continue in the next level of the university study, he/she will gain required wide professional profile and he/she is able to adapt in different technical or other businesses. Graduates of Autotronics study programme should be professionals who are able to identify various electronic faults in cars. They can successfully apply mainly in car services and repair workshops, car selling shops and in education institutions.

Software skills: C language, C++, MATLAB, Simulink, CodeWarrior, CodeComposer, Asembler, AVR Studio, Vissim, PLECS..

BIOMEDICAL ENGINEERING

(Field of study Electrical and Electronics Engineering)

Graduate has acquired knowledge in the subjects of a theoretical and technical basis, as well as in a theoretical basis of medical disciplines with emphasis on the structure and functioning of biological objects, biochemical, physiological and pathophysiological processes. He/she has gained knowledge of medical technique and its applications, modern tools of biomedicine, principles of their activities, conditions for operation and their safe utilisation for diagnostic and treatment purposes. He/she is able to evaluate functionality of technical and computer aided equipment under given conditions of a health care facility or other operations and laboratories and at the same time able to lead qualified communication with the health care staff. He/she will successfully apply as an expert in medical and biological laboratories, in the operation of biomedical technique, in business and service organisations.

Software skills: C language, MATLAB, EAGLE.

DIGITAL TECHNOLOGIES

(Field of study Computer Science)

Graduate has acquired knowledge from the basic disciplines in the field oriented to general professional knowledge in the area of digital technologies, electronics, optoelectronics, communication systems, networks and services, transmission media to be connected with obtaining practical experience in the field of digital technologies, mainly information processing, transmission and communication systems. He/she has gained experience and skills in the field of digital system operation. Apart from that, he/she has acquired basic legal, economic and managerial knowledge to be utilised in the field of digital system services, digital security and language skills including specific terminology. Graduate will apply successfully as a technician, technologist or manager of technician team, administrator of digital devices and systems.

Software skills: C language, C++, PHP, JavaScript, MySQL, Flash animations, Code Blocks, LabView, PHPMyAdmin, MySQLWorkbench, ILEAD GIF Animator, XARA X, ADOBE Imagereak, Adobe After Effects, AVI 3d studio, DiagramDesigner, HTML Kit.

ELECTRICAL ENGINEERING

(Field of study Electrical and Electronics Engineering)

Graduate has acquired knowledge of the subjects of theoretical base applied in the fields of power electronics, utilisation of applied microprocessor technique and programming, electric drives, electrical traction, electric power systems and mechatronics. He/she has gained knowledge in the field of quality management and reliability in a production company, marketing and trade, electrical standards, law and legal regulations related to the field of study. Graduates may further specialise in the field of automobile electrical engineering, electrical traction, electric drives, electric power systems, and power electronic systems and mechatronics systems. Graduates have obtained theoretical knowledge and practical experience in order to acquire the principles, installations, operations, functions, service and repairs of electrical products, devices and equipment in compliance with international standards. He/she will successfully apply in all fields of power electrical engineering, in the field of mechatronics, robotics, applied microprocessor technique, electronics, optoelectronics, power electronics, computer design and construction in organisations of administrative, production, operation or repair character.

Software skills: MS Office, MATLAB, SIMULINK, FEMM, MOTORSOLVE, SICHR, DIALUX, DSPACE, CODE WARIOR, LABVIEW, EMPT-ATP, MODES, GE-PSLF, RUPLAN, RS Logix, RS Link, RS View, Assembler, AVR Studio, EAGLE, OrCAD-PSPICE, PLECS.

MULTIMEDIA TECHNOLOGIES

(Field of study Computer Science)

Graduate has acquired knowledge in acquisition, processing and presentation of digital signal at an adequate technical, aesthetical, ethical and art levels. The synergy of technical and art education will make the graduate a specialist in creating multimedia presentations. Graduate has gained knowledge and practical experience in working with the screen and the sound element of multimedia that predetermines him/her for work in organisations focused on information technologies, advertising and counselling activities, in public administration institutions, in studios producing multimedia products.

Software skills: C language, C++, MATLAB, Java, JSP, Blender, Cinema 4D, Adobe Premiere, Adobe Audition, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Protools, HW, SQL, PSpice, Microsim, Corel Draw, QuarkxPress, LaTeX.

TELECOMMUNICATIONS

(Field of study Computer Science)

Graduate has acquired necessary theoretical and specific knowledge, information on technologies and methods in the field of transmission and processing of all information types, on the structure and operation of respective equipment and systems of fixed and mobile networks. He/she has knowledge in information technology utilisation in the given field, as well as knowledge in economics, management, psychology and legal regulations. He/she may successfully operate in companies focused on the area of communication and information technologies as an executive and managing employee.

Software skills: C language, C++, MATLAB, Java, JSP, Blender, 3dMax, Cinema 4D, Audition, Protools, Premierepro, HW, Adobe InDesign, SQL, PSpice, Microsim, Adobe Illustrator, Corel Draw, QuarkxPress, LaTeX, Blender, 3dMax, Cinema 4D, Photoshop, MS Office, MATLAB, SIMULINK, from SPICE family – simulation programs focused on analyses and syntheses of electronic circuits, EAGLE, LabView, VPIphotonics.

ADDITIONAL EDUCATIONAL ACTIVITIES

In addition to education in a selected study programme, the Faculty of Electrical Engineering and Information Technologies enables its students to obtain a QUALITY MANAGER certificate which allows them to significantly extend their application in practice, especially in production-oriented companies. During the study students complete professional experience, thereby directly obtain practical experience in quality management.

The faculty offers its students the opportunity to obtain the CLAD – Certified LabVIEW Associate Developer certificate from National Instruments company through the LabVIEW Academy which operates at our faculty. This certificate represents an excellent entry asset for job seekers in companies dealing with automation, measurement, testing, industrial production or computer vision in LabVIEW.

The Cisco Academy also operates at the Faculty where students can take advantage of free preparation for obtaining Cisco Certified Network Associate industrial certificates.

Our faculty, together with its industrial partners, offers students free tuition of professional English and German, enabling them to expand their language competence in the area they study.
